

## THE SMART CHOICE IN APPLIED FLOORING SYSTEMS

- One (1) hour fully cured & ready for full traffic.
- Seamless, resilient, resin rich flooring.
- Hardwearing, long-life anti-slip (safety flooring).
- Highly abrasion & chemical resistant.
- Workmanship & materials - 5 year guarantee.

# Restaurants, Catering, Hotels & Commercial / Retail

**MONOTEK** MMA resin rich, rapid setting, seamless, trowel-applied (3 – 25 mm thick) flooring systems are uniquely highly flexible, and as such can be installed **SEAMLESS & JOINT-FREE**. This resilience & flexibility also ensures that it is able to withstand heavy impacts & even substrate movement without compromising the hygienic seal of your flooring surface. **MONOTEK** can be easily & rapidly repaired if damaged & anti-slip re-applied when worn in very heavy high traffic areas such as kitchen pot wash, bar floors, walkways, retail shops, etc...

**MONOTEK** flooring systems are specifically designed with the hospitality, tourism & commercial food industry in mind, as they **TOTALLY CURE IN ONE (1) HOUR**, so downtime can be kept to the absolute minimum. Typically, in a commercial kitchen application for example, we could commence works after the last meals are served & still have all preparation & installation completed, ready for full service before breakfast the next morning. **MONOTEK** flooring provides a hygienic, safe (anti-slip can be varied to suit various areas) & easily cleaned flooring surface, which is highly chemical & abrasion resistant. **MONOTEK** flooring systems can be applied directly over sound ceramic tiles, concrete or cement / plywood sheet, and also can be formed vertically into coving for wall/floor junctions. **MONOTEK** can be applied inside cool rooms & freezers while they are still operating & in very low ambient temperatures, as it will cure at temperatures as low as minus 30°C. Finally, **MONOTEK** is available in a wide range of coloured sand/minerals (granite – look) & multi-coloured chip/flake (**MonoChip**) finishes so it will compliment any contemporary design.

Typical previous applications in the restaurant / catering / hotel & commercial / retail food preparation industries for **MONOTEK** flooring have been –

- KITCHENS & COMMERCIAL FOOD PREPARATION AREAS
- LOADING DOCKS & SERVICES AREAS
- BAR AREAS & COOLROOMS / FREEZERS
- LAUNDRIES
- TOILETS & WASHROOMS
- RETAIL SHOPS (BUTCHERS, SEAFOOD & DELICATESSEN'S)
- PLANTROOMS & WORKSHOPS

**MONOTEK** flooring systems are exclusively supplied & applied, Australia-wide by **D.P.J. Coating Systems Pty Ltd** (100% Australian owned, family business, established in 1977), and come with an "excuse proof" – 5 year guarantee of materials & performance. We never use sub-contractors to apply **MONOTEK** flooring systems.
